Front end web developer with experience in JavaScript, and React. As a background in project specialist, I bring strong skills in project management, event organizing that helped small and medium enterprises promote their export rates. Now, as a developer, I want to create a more positive impact by working on social issues-oriented projects in my career.

TECHNICAL PROJECTS

Juniper - Github | Demo
Juniper is created for informing children in the MENA region about environmental issues and climate change with games and resources.
+ Designed via Figma and created playful and colorful designs for kids.
+ Used React JS and Ant Design for building the website and responsive layout.
+ Used i18next for multi language features.
+Did unit testing with Jest.
+Worked with Gitflow workflow and followed Agile Methodologies.

Back to the Movies - Github | Demo
Back to the Movies offers movie recommendations to cinema lovers via searching for the latest movies, future movies as well as movie genre, popularity.
+ Wrote codes in pure JavaScript and object-oriented programming approach to DRY coding.
+ Used The Movie Database API, then queried to GET results with Postman API, lastly fetched movie data with asynchronous functions.
+ Got data with asynchronous fetching to build essential functionalities(filtering movies by popularity, release date, upcoming, the single movie section, the actor page).

Portfolio - Github | Demo
Portfolio is consists of my work experience and projects.
+ Wrote codes in React JS and used React-Router for creating multi pages.
+ Used Material Design Bootstrap for making all pages fully responsive.
+ Designed with Material Design Bootstrap for layout and elements' harmony.

TECHNICAL SKILLS

JavaScript, React JS, HTML, CSS, AJAX, Firebase, Git, Jest, i18next
Figma, Ant Design, Material Design Bootstrap, Bootstrap
Functional Programming, Object-Oriented Programming, Gitflow workflow, Agile Methodology, Block Element Modifier Methodology
